# NEW

Il reparto MANETTI SPORT ha sviluppato, messo a punto e realizzato **Eco Sa-Ni**, un poliuretano innovativo, **ecosostenibile**, prodotto recuperando gli scarti di lavorazione, processo che consente all'azienda di diminuire l'immissione di nuova materia nel ciclo produttivo. MANETTI SPORT è attualmente la prima e unica azienda in Italia a produrre, grazie a questo nuovo materiale ed a macchinari appositamente dedicati ed altamente tecnologici, **fussbett ecosostenibili**.

**Eco Sa-Ni** è realizzabile su tutti gli stampi e tutte le densità desiderate.

*The MANETTI SPORT department has developed, put in place and produced **Eco Sa-Ni**, an innovative, **eco-sustainable** polyurethane, produced by recovering processing waste, a process that allows the company to reduce the introduction of new material into the production cycle. MANETTI SPORT is currently the first and only company in Italy to produce **eco-sustainable fussbett**, thanks to this new material and dedicated, high-tech machinery.*

**Eco Sa-Ni** can be produced on all moulds and all desired densities.
